

Request for export consignment sampling before the issuance of a Certificate of Inspection (COI)

- For exports to the European Community and Switzerland:** Products with CN Codes chapter 10, 11, 12 and 23 from one of the following countries, *Kazakhstan, Moldova, Russia, Ukraine*, bio.inspecta must carry out sampling and analysing for each lot to be shipped, prior to issuing the COI.
Please note that sampling is done according to Reg. (EU) 691/2013, which means either the size of a sample does not exceed 500 t, or, for samples >500 t, incremental samples are increased to 40+√tonnes (for substances uniformly distributed); 100+√tonnes (for substances non-uniformly distributed).
Products stored in separate heaps/ storage buildings have to be sampled and analysed individually.
- For exports to the United States of America:** Corn, soy, wheat, dry edible beans, sunflower meal, and flax from one of the following countries: *Kazakhstan, Moldova, Romania, Russia, Turkey, or Ukraine*. bio.inspecta must carry out sampling and analysing for each lot to be shipped prior, to issuing the COI.
Please keep in mind that APHIS requires fumigation at the border for certain commodities. This will lead to a declassification of the products. For certain commodities APHIS prohibits the import at all. This list changes very often. Therefore bio.inspecta recommends to clarify the current situation with the buyer in the USA.
- bio.inspecta orders sampling and analysis after receiving this form.**
The analysis result will be sent to bio.inspecta with a copy to the customer. The invoice of the sampling/analysing institute is received by the client. Please give clear indication where sampling has to be taken and at which time.

Name and address of exporter / seller	
Name and address of producer and (if applicable) processor of the product	
Name, address and code of producer's or processor's inspection body, if not bio.inspecta	
Country of dispatch	
Country of origin	
Country of destination	
Trade name of the product and year of harvest	
Scope of the product	<input type="checkbox"/> A: Unprocessed plant products <input type="checkbox"/> D: Processed agricultural products for use as food
Lot number	
Number and kind of packing units	

Quantity:	Required services:
Type of loading at time of sampling:	Place of sampling (address):
Status of loading at time of sampling:	Places of storages (warehouse number)/ heaps and respective quantities:
Billing address for sampling:	Start of service:
Billing address for analysis:	Preferred surveyor:
Contact person phone number:	Preferred laboratoy:
	Quick analysis wished (5 working days, Standard: 10 working days): Yes <input type="checkbox"/> /No <input type="checkbox"/>

- The sample shall be taken at loading
- The sample shall be taken at preparing the consignment
- In cases where there are justified reasons why it is not feasible to do the sampling and analysis ordered by bio.inspecta at final loading (e.g. due to truck wise transport and direct loading at port), in addition to the sampling and analysis ordered by bio.inspecta at your operation, you are required to provide justification and confirmation that you engage an independent third party surveyor (GAFTA member), to do additional sampling during loading at port. If required, these samples are to be available for analysis. Justification is submitted to bio.inspecta before the COI is being issued, and the reports of the surveyor (sampling, inspection, photo) are submitted as soon as they are received.

After receiving and assessing the analysis results, and after receiving the request for COI (document No. 25_054), the Certificate of Inspection will be issued providing no unallowed pesticide- or GMO-residues are found.

Please submit this request with all attachements by Fax: +41 (0)62 865 63 01
